

Global Supply Solution

More than a business -
built on sincerity and
trust

About

Global Supply Solution LLC, headquartered in Baku, Azerbaijan, is a reliable partner in the supply of high-quality products for production, construction, and safety sectors. With a strong commitment to excellence, we cooperate with leading international manufacturers to deliver trusted solutions that meet global standards.

Our company is dedicated to building long-term partnerships based on integrity, professionalism, and trust. By combining international expertise with local market knowledge, we provide our clients with consistent value, ensuring efficiency and reliability in every project we support.

Why Explore This Catalogue?

This catalogue has been prepared to provide our clients with a comprehensive overview of our product range and services. It serves as a practical guide to identify the most suitable solutions for your production, construction, and safety requirements. By reviewing these pages, you will discover how Global Supply Solution LLC can support your business with reliable products, professional service, and a commitment to quality at every stage.

Construction Materials

Construction Materials

Woodboards

Plywood

Pipe (Steel-Pvc)

Steel rebar

Industrial Hose & Fittings

Industrial Hose & Fittings

Ring Gasket

Sealing ring used to prevent leaks between flanged connections in pipelines.

Types:

- Rubber / Silicone / PTFE – For chemical and temperature resistance
- Metal / Spiral Wound – For high-pressure, high-temp applications
- Standard & Custom Sizes – Available for various flange

Camlocks

Quick-connect couplings for fast and secure hose or pipe connections without tools.

Types:

- Type A-F, Dust Cap & Plug – Standard configurations
- Aluminum / Stainless Steel / Brass / Polypropylene – Material options
- Sizes from ½" to 6" – For various flow requirements

Industrial Hose

Flexible hoses for air, water, oil, chemicals, and other industrial fluids.

Types:

- Air & Water Hose – General-purpose use
- Oil & Fuel Hose – Resistant to petroleum products
- Chemical Hose – For aggressive media
- Steam Hose – High temperature and pressure

Industrial Hose & Fittings

Hydraulic Hoses

Flexible and durable hoses designed for high-pressure fluid transmission in hydraulic systems. Available in various types for different pressure levels and applications:

R1AT/R2AT – for medium to high pressure

4SP/4SH – for very high pressure

R12/R13/R15 – for heavy-duty use

Thermoplastic – lightweight and corrosion-resistant

PTFE – heat and chemical resistant

Hydraulic Fittings

Connectors for secure and leak-free hose-to-hose or hose-to-machine connections in hydraulic systems.

Types:

BSP / NPT / JIC / ORFS / Metric – Thread standards

Straight / Elbow / Tee / Cross – Shape options

Crimped & Reusable – For different assembly needs

Carbon Steel / Stainless Steel / Brass – Material options

Hose Clamps

Durable clamps used to secure hoses onto fittings or pipes, ensuring leak-proof connections.

Types:

Worm Drive Clamps – Adjustable, common for general use

T-Bolt Clamps – For high-pressure applications

Ear Clamps – Permanent, compact design

Spring Clamps – Quick and tool-free installation

Industrial Hose & Fittings (Hammer Union)

Construction

- Hammer Nut – tightened with a hammer
- Male Sub – with external threads or butt-weld
- Female Sub – threaded or socket end
- Seal – elastomer (NBR, Viton) or metal-to-metal

Sizes Available

From 1" to 6" (25 mm – 150 mm)

Pressure Ratings

From 1,000 to 15,000 psi, depending on the figure type

Materials

- Forged carbon steel
- Stainless steel (available upon request)
- Seals: NBR, HNBR, Viton, PTFE

Construction

- Hammer Nut – tightened with a hammer
- Male Sub – with external threads or butt-weld
- Female Sub – threaded or socket end
- Seal – elastomer (NBR, Viton) or metal-to-metal

Figure	Pressure	Color	Application
Fig. 50	1,000 psi	Black	Low-pressure, vacuum lines
Fig. 100	2,000 psi	Red	General-purpose fluid transfer
Fig. 200	2,000 psi	Blue	Mud and manifold systems
Fig. 206	2,000 psi	Green	Butt-weld connections
Fig. 400	4,000 psi	Yellow	Medium-pressure drilling systems
Fig. 602	6,000 psi	Grey	Acidizing, cementing
Fig. 1002	10,000 psi	Orange	High-pressure well service
Fig. 1502	15,000 psi	Red/Blue	Fracturing, high-pressure applications

Waste Containers

Waste Containers

Waste Bins

Plastic bins

- Resistant to moisture and temperature changes
- Lightweight and easy to use
- Some models come with lids and wheels

Metal bins

- High durability and wear resistance
- Suitable for outdoor and industrial use
- Resistant to mechanical damage

Capacity

- 80 liters – compact, suitable for homes and small spaces
- 120 liters – standard size, ideal for private households
- 240 liters – optimal for yards and small businesses
- 360 liters – increased capacity, suitable for offices and utilities
- 660 liters – for commercial and multi-unit residential use
- 770 liters – reinforced models, easy to handle
- 1100 liters – maximum volume, ideal for large amounts of waste

Flammable Waste Container

Designed for the safe collection and temporary storage of flammable or combustible waste materials. Made from fire-resistant materials and equipped with a secure lid to minimize fire risk. Ideal for laboratories, workshops, industrial facilities, and areas handling flammable substances. Complies with safety regulations for hazardous waste disposal

Traffic Management

Traffic Management

Lane Marking & Hazard Tapes

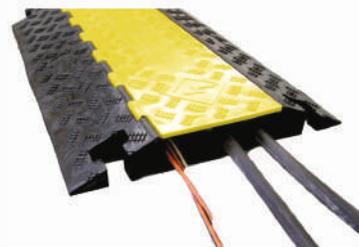

Traffic Post

Traffic Cone

Cable Protector

Speed Bumps

Spill Control

Spill Control

Chemical Spill Kit 120ltr / 240ltr

Compact kit for quick cleanup of various liquid spills up to 30 liters. Includes customizable absorbent materials for oils, chemicals, and water-based fluids.

Optional Contents (assembled on request):

- Chemical absorbent pads
- Absorbent socks
- Protective gloves and goggles
- Disposal bags
- Neutralizing agents (optional)

Key Features:

- Absorbs hazardous chemicals safely
- Durable and portable
- Ready for emergency use
- Suitable for industrial and laboratory environments

Oil & Fuel Spill Kit 120ltr / 240ltr

Heavy-duty kits for cleaning oil and fuel spills up to 120 or 240 liters, with hydrocarbon-specific absorbents and customizable contents.

Optional Contents (assembled on request):

- Oil and fuel absorbent pads
- Absorbent socks
- Protective gloves
- Disposal bags

Key Features:

- Absorbs oil and fuel only, repels water
- Durable and portable
- Ready for emergency response
- Suitable for industrial and outdoor environments

Spill Control

Oil Absorbent Pillow

Oil Absorbent Boom

Oil Absorbent Roll

Oil Absorbent Pad

Oil Absorbent Sock

Universal Absorbent Pad

Drum top Absorbent Pad

Spill Pallet For 2 Drums

Spill Pallet For 4 Drums

Spill Control

General Spill Bag Kit 30L

Compact kit for quick cleanup of various liquid spills up to 30 liters. Includes customizable absorbent materials for oils, chemicals, and water-based fluids.

Optional Contents (assembled on request):

- Universal absorbent pads
- Absorbent socks
- Protective gloves
- Disposal bag

Key Features:

- Absorbs oil, chemicals, and water-based liquids
- Lightweight and easy to carry
- Ready for immediate spill response
- Suitable for indoor and outdoor use

Oil Spill Bag Kit 30L

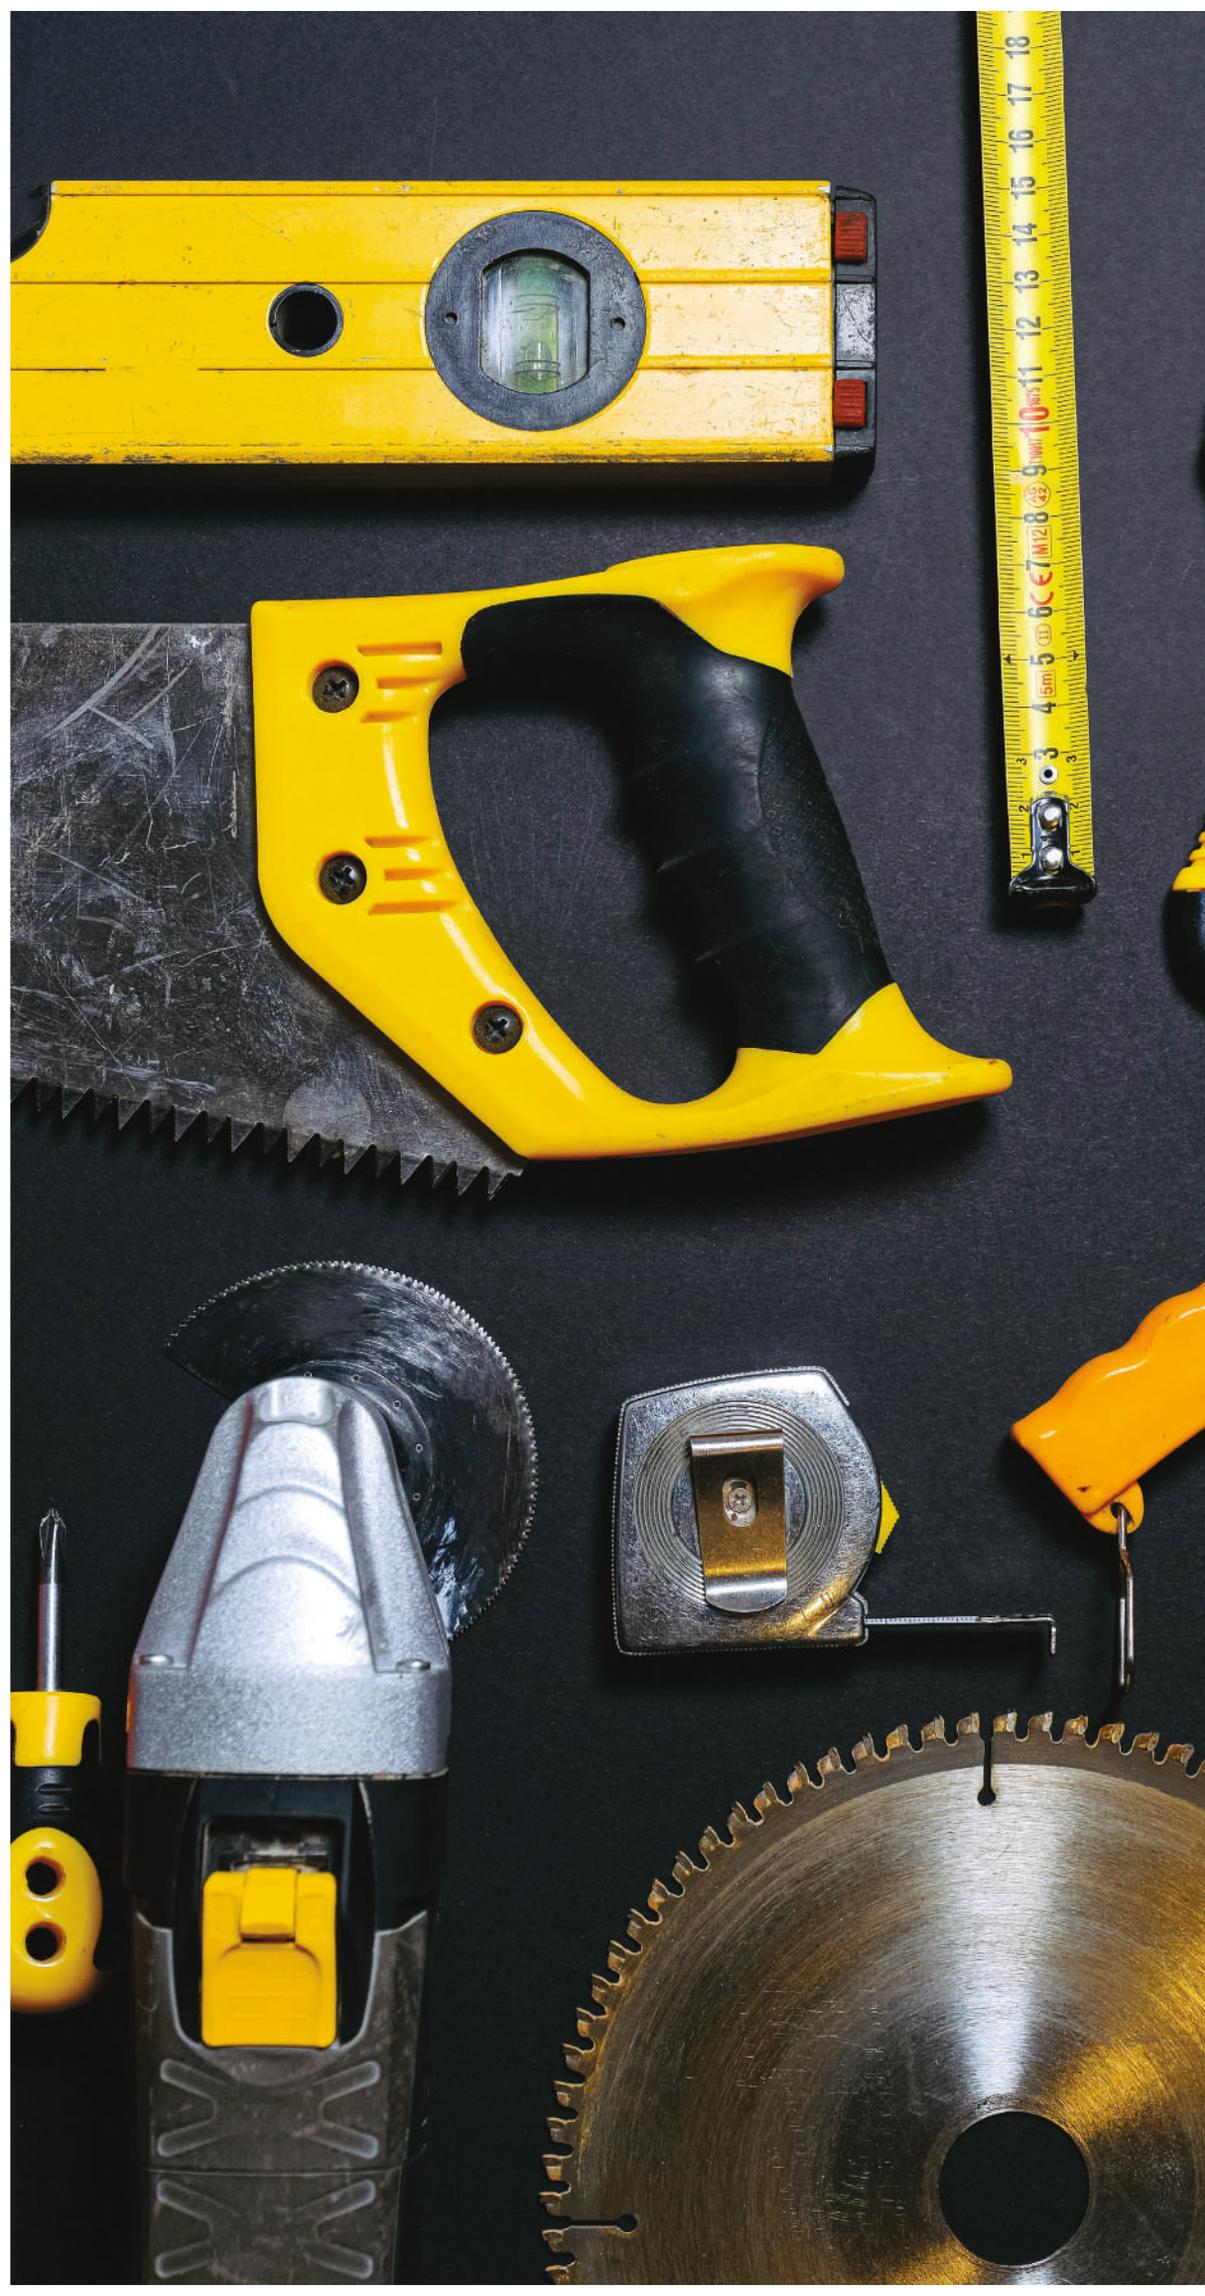

A compact kit for fast containment and cleanup of oil spills up to 30 liters, with customizable absorbent materials.

Optional Contents (assembled on request):

- Oil absorbent pads
- Oil absorbent socks
- Protective gloves
- Disposal bag
- Materials for collecting small droplets and stains

Key Features:

- Absorbs oil only, repels water
- Lightweight and portable
- Ready for emergency use
- Suitable for indoor/outdoor use

Tools

Tools

Abrasives

- Cutting Discs
- Grinding Discs
- Flap Discs
- Sanding Belts
- Abrasive Sheets & Rolls
- Wire Brushes & Wheels
- Polishing Pads & Compounds
- Diamond Blades & Cup Wheels

Cutting Tools

- Drill Bits
- Hole Saws
- Saw Blades
- Cutting Discs
- Milling Cutters
- Taps & Dies
- Utility Knives & Blades
- Reamers

Hand Tools

- Screwdrivers
- Wrenches
- Pliers
- Hammers
- Measuring Tapes
- Utility Knives
- Saws
- Tool Sets

Measuring & Testing

- Micrometers
- Multimeters
- Voltage Testers
- Thermometers
- Abrasive Sheets & Rolls
- Wire Brushes & Wheels
- Polishing Pads & Compounds
- Diamond Blades & Cup Wheels

Power tools

Durable and efficient tools for construction, woodworking, metalworking, and maintenance. Designed for professionals and DIY users. Available in corded and cordless versions.

Applications:

Drilling, cutting, grinding, sanding, fastening, mixing, polishing, and more.

Features:

- Powerful motors for demanding tasks
- Ergonomic and compact designs
- Variable speed controls
- Long battery life (for cordless models)
- Compatibility with multiple accessories.

Popular Types:

- Drills & Impact Drivers
- Angle Grinders
- Rotary Hammers & Demolition Hammers
- Circular Saws & Jigsaws
- Sanders & Polishers
- Heat Guns
- Mixers
- Nail Guns
- Power Screwdrivers
- Multi-tools

Lifting & Accessories

Lifting & Accessories

Hoists

Reliable lifting equipment for industrial and construction use. Designed to safely lift and move heavy loads with minimal effort. Available in manual, electric, and chain-operated models.

Categories:

- Manual Chain Hoists
- Lever Hoists
- Electric Hoists
- Wire Rope Hoists
- Air Hoists
- Trolley Systems

Lanyards

Safety lanyards designed for fall protection in construction, maintenance, and industrial work. Used as part of personal fall arrest systems to secure workers at height.

Categories:

- Shock-Absorbing Lanyards
- Restraint Lanyards
- Positioning Lanyards
- Adjustable Lanyards
- Twin-Leg Lanyards
- Self-Retracting Lanyards

Chemical & Oil Rust Removers

Chemical & Oil Rust Removers

BAKERLOCK Thread Locking Compound

Bakerlok is a superior thread locking compound, commonly used for casing, tubing and drilling joints to prevent accidental detaching of string components during drilling operations.

WD 40 products

WD-40 offers a range of products, from the original multi-use can to penetrants, lubricants, cleaners, degreasers, and rust solutions, to help you Get the Job Done Right.

Magnaflux Testing Product

Oil & Gas NDT pros trust Magnaflux magnetic particle and liquid penetrant solutions for quality testing of SEA, tubular goods, casing, pipes, tubing, couplings, BHA, and more.

RTD Compound

RTD Compound is a soft paste for cutting operations on all metals, including hardened steels, nimonics, and titanium, reducing friction for superior performance.

MOLYKOTE Specialty Lubricants

MOLYKOTE® provides advanced solutions for tough design and lubrication challenges, offering a full range of specialty lubricants to meet current and future needs.

Personal Protective Equipment

Personal Protective Equipment

Hand Protection

Gloves designed to protect against mechanical injuries, chemicals, high temperatures, and contamination. Essential for safe work in industry, construction, and healthcare

Respiratory Protection

Respirators, masks, and filters that safeguard against dust, gases, vapors, and aerosols. Provide reliable protection in polluted air environments.

Head Protection

Safety helmets and hard hats to prevent injuries from falling objects and impacts. Widely used in construction, industry, and manufacturing

Body Protection

Protective clothing, high-visibility vests, and coveralls designed to shield from chemicals, fire, electricity, and harsh environmental conditions.

Eye & Face Protection

Safety glasses and face shields that protect against mechanical particles, chemical splashes, and intense light exposure.

Hearing Protection

Earplugs and earmuffs that reduce noise levels in industrial and construction environments, preventing hearing damage.

Personal Protective Equipment

Cleaning Tissues

Eye Wash Refill

Glasses Cleaning Spray

Emergency Shower & Eye Wash

Personal Protective Equipment

Eye Wash Station

Compact and essential safety unit for immediate eye rinsing in case of chemical or dust exposure.

Features:

- Includes 1–2 sterile saline bottles (500ml each)
- Wall-mounted or portable design
- Easy access with clear instructions and mirror
- Dust cover for hygiene protection
- Complies with international safety standards types

First Aid Kit For Vehicle

Compact and essential kit for treating minor injuries during road emergencies.

Features:

- Includes bandages, antiseptic wipes, gauze, scissors, gloves, and more
- Packed in a durable, portable case
- Meets standard road safety regulations
- Ideal for cars, trucks, buses, and commercial fleets

First Aid Kit For Workplace

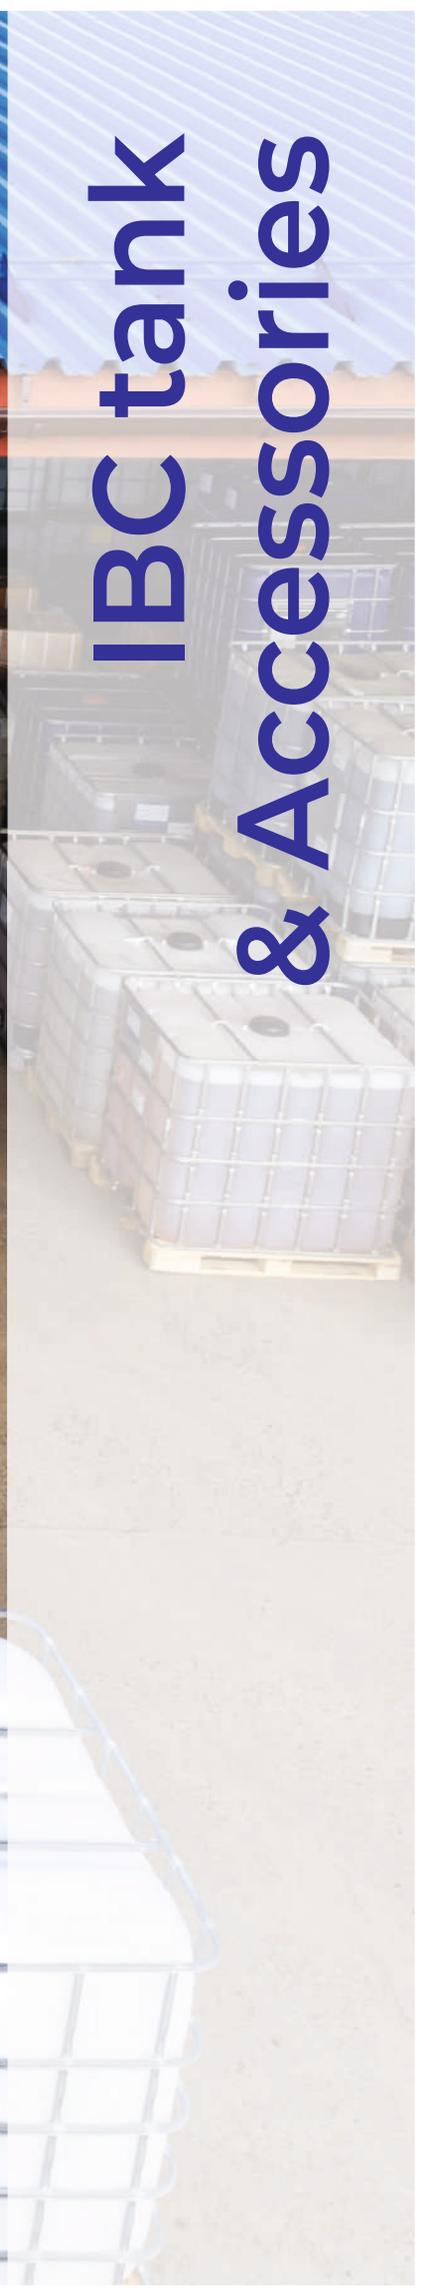

Comprehensive kit designed to handle common injuries in office, industrial, or construction environments.

Features:

- Includes bandages, plasters, antiseptics, gloves, scissors, eye wash, burn treatment, and more
- Packed in a clearly labeled, wall-mountable or portable case
- Complies with workplace health & safety standards
- Available in different sizes for small to large teams

IBC tank & Accessories

IBC Tank & Accessories

IBC Tank (Intermediate Bulk Container)

Durable and reusable container designed for the storage and transport of liquids, chemicals, and bulk materials.

Main Components:

- HDPE inner bottle – high-density polyethylene, chemical-resistant
- Galvanized steel cage – provides structural protection and stability
- Pallet base – made of plastic, steel, or composite for forklift handling
- Top cap – screw-on lid for filling access, typically 150mm diameter
- Bottom valve – discharge valve (usually 2") for controlled emptying of contents

Highlighted Parts:

- Valve: Ensures safe and easy dispensing, often a ball valve or butterfly valve
- Cap: Seals the tank to prevent contamination and spillage

Applications:

Used in agriculture, chemicals, food processing, and industrial logistics.
